  - Elective

Fall Semester

- Econ 5360 Mathematical Economics
- Econ 6301 Econometrics I
- Econ 6401 Microeconomic Theory I
- Elective

Spring Semester

- Econ 5501 Macroeconomic Theory
- Econ 6302 Econometrics II
- Econ 6402 Microeconomic Theory II
- Econ 6390 Research
- Comprehensive Exam

2\textsuperscript{nd} Summer Session

- Research Paper or Elective

In our “typical sequence” students begin our program in the summer after graduation. However, there are several common options in addition to the typical sequence. Our most well-prepared students (usually international students) can skip the 1st year summer session and take an additional elective in the fall and spring semesters, finishing their degree in 12 months. "Spring starters" can begin with Macroeconomic Theory and two electives, completing the program in 17 months. Less well-prepared students can lighten their fall and spring course loads by extending their time to completion.
